

AMENDMENTS TO THE CLAIMS

The following listing of claims will replace all prior versions, and listings, of claims in the above-identified patent application.

Listing of Claims:

Claims 1-54 (canceled).

55. (New) A method for providing a history feature in an interactive television program guide, wherein the interactive television program guide is implemented at least in part on user television equipment and supports at least one supported application running at least in part on the user television equipment, comprising:

displaying an interactive television program guide comprising a list of resources including at least a program guide database and the Internet;

receiving a first indication to access a history feature;

receiving a second indication to access the history feature;

providing a history list of a plurality of resources that includes a first resource in response to the first indication to access the history feature, wherein the first resource is a program guide display having data from the program guide database, and wherein the first resource is included in the history list because it was accessed by a user using the user television equipment; and

providing the history list of a plurality of resources that includes a second resource in response to the second indication to access the history feature, wherein the second resource is a web site from the internet, and wherein the second resource is included in the history list because it was accessed by a user using the user television equipment.

56. (New) The method defined in claim 55 further comprising:

receiving an indication of a particular resource of the history list; and

providing the resource in response to the indication.

57. (New) The method defined in claim 55 wherein receiving the first and second indications comprises receiving the indications from a supported application or a user input device.

58. (New) An interactive television program guide system for providing a history feature in an interactive television program guide, wherein the interactive television program guide is implemented at least in part on user television equipment and supports at least one supported application running at least in part on the user television equipment, comprising:

means for displaying an interactive television program guide comprising a list of resources including at least a program guide database and the Internet;

means for receiving first indication to access a history feature;

means for receiving a second indication to access the history feature;

means for providing a history list of a plurality of resources that includes a first resource in response to the first indication to access the history feature, wherein the first resource is a program guide display having data from the program guide database, and wherein the first resource is included in the history list because it was accessed by a user using the user television equipment; and

means for providing the history list of a plurality of resources that includes a second resource in response to the second indication to access the history feature, wherein the second resource is a web site from the Internet, and wherein the second resource is included in the history list because it was accessed by a user using the user television equipment.

59. (New) The system defined in claim 58 further comprising:

means for receiving an indication of a particular resource of the history list; and

means for providing the resource in response to the indication.

60. (New) The system of claim 58 wherein the means for receiving the first and second indications comprises means for receiving the indications from a supported application or a means for receiving the indications from a user input device.

61. (New) An interactive television program guide system for providing a history feature comprising:

user television equipment on which an interactive television program guide and one or more supported applications are at least partially implemented, wherein the interactive television program guide is configured to:

display a list of resources including at least a program guide database and the Internet;

receive a first indication to access a history feature;

receive a second indication to access the history feature;

provide a history list of a plurality of resources that includes a first resource in response to the first indication to access the history feature, wherein the first resource is a program guide display having data from the program

guide database, and wherein the first resource is included in the history list because it was accessed by a user using the user television equipment; and  
provide the history list of a plurality of resources that includes a second resource in response to the second indication to access the history feature, wherein the second resource is a web site from the Internet, and wherein the second resource is included in the history list because it was accessed by a user using the user television equipment.

62. (New) The system defined in claim 61 wherein the interactive television program guide is further configured to:

receive an indication of a particular resource of the history list; and  
provide the resource in response to the indication.

63. (New) The system of claim 61 wherein the interactive television program guide is further configured to receive the first and second indications from a supported application or a user input device.
